Building Construction Handbook Download A Building Construction Handbook By Roy Chudley And Roger Greeno A eAAA The Building Construction Handbook originated in 1982 as a series of four eAAAcheck-books eAAA written and illustrated by Roy Chudley. In 1988 these successful study guides were consolidated into one volume under the present title. The format of comprehensive illustrations and support text has been maintained as revisions and updates are incorporated into new editions. This latest edition contains a fresh assessment of the practices, procedures, guidance and legislation appropriate to construction and maintenance of housing and other low-rise buildings. It also includes applications to medium and larger scale structures for commercial and industrial purposes. The content of the book is extensive, although no textbook, not least this one, could ever incorporate all practices experienced in an industry so diverse as construction. The content is not exemplar and neither does it attempt to be prescriptive. It is a perspective of construction principles including guidance to processes and, where appropriate, associated design.
